About the Company

Trust Group is one of the leading companies in the field of design and engineering consulting in the Egyptian market because it provides distinctive engineering services according to national and global requirements and codes.

The idea of the company originated in 2008 by Dr. Eng. Mohamed Ibrahim, a lecturer at the faculty of engineering at Suez Canal University, he and a group of experts in various fields of Engineering, led to impressive results and smart engineering solutions.

Our Mission and Vision

Mission

To be a leading consultant company in the global market.

To become the customers' most preferred choice by attaining excellence in quality and timely completed value-added projects.

To provide the highest level of service in engineering consultancy while offering superior craftsmanship to every project, we handle.

To continually innovate, develop and adopt state-of-the-art technology in methods and materials to enhance productivity and cost-effectiveness.

To continually improve the competence of our team, and employ diverse, innovative & results-oriented personnel, motivated to deliver excellence.

Vision

To become the leading construction firm, while delivering projects that consistently exceed international standards and provide exceptional customer satisfaction.

To continually deliver excellent value & innovative construction solutions to meet our client's requirements.

Using modern principles and sophisticated technologies, TRUST GROUP Company envisions being the primary preference at all times both nationally and globally, for their renowned excellence, quality, performance, and reliability in all types of constructions.

Our Services

Trust Group provides engineering consulting services in a wide range of engineering disciplines. Our design team incorporates architectural structural, mechanical, civil, and electrical engineers.

Engineering consulting

Technical services

Civil & Structure services

Architectural services

Electromechanical services

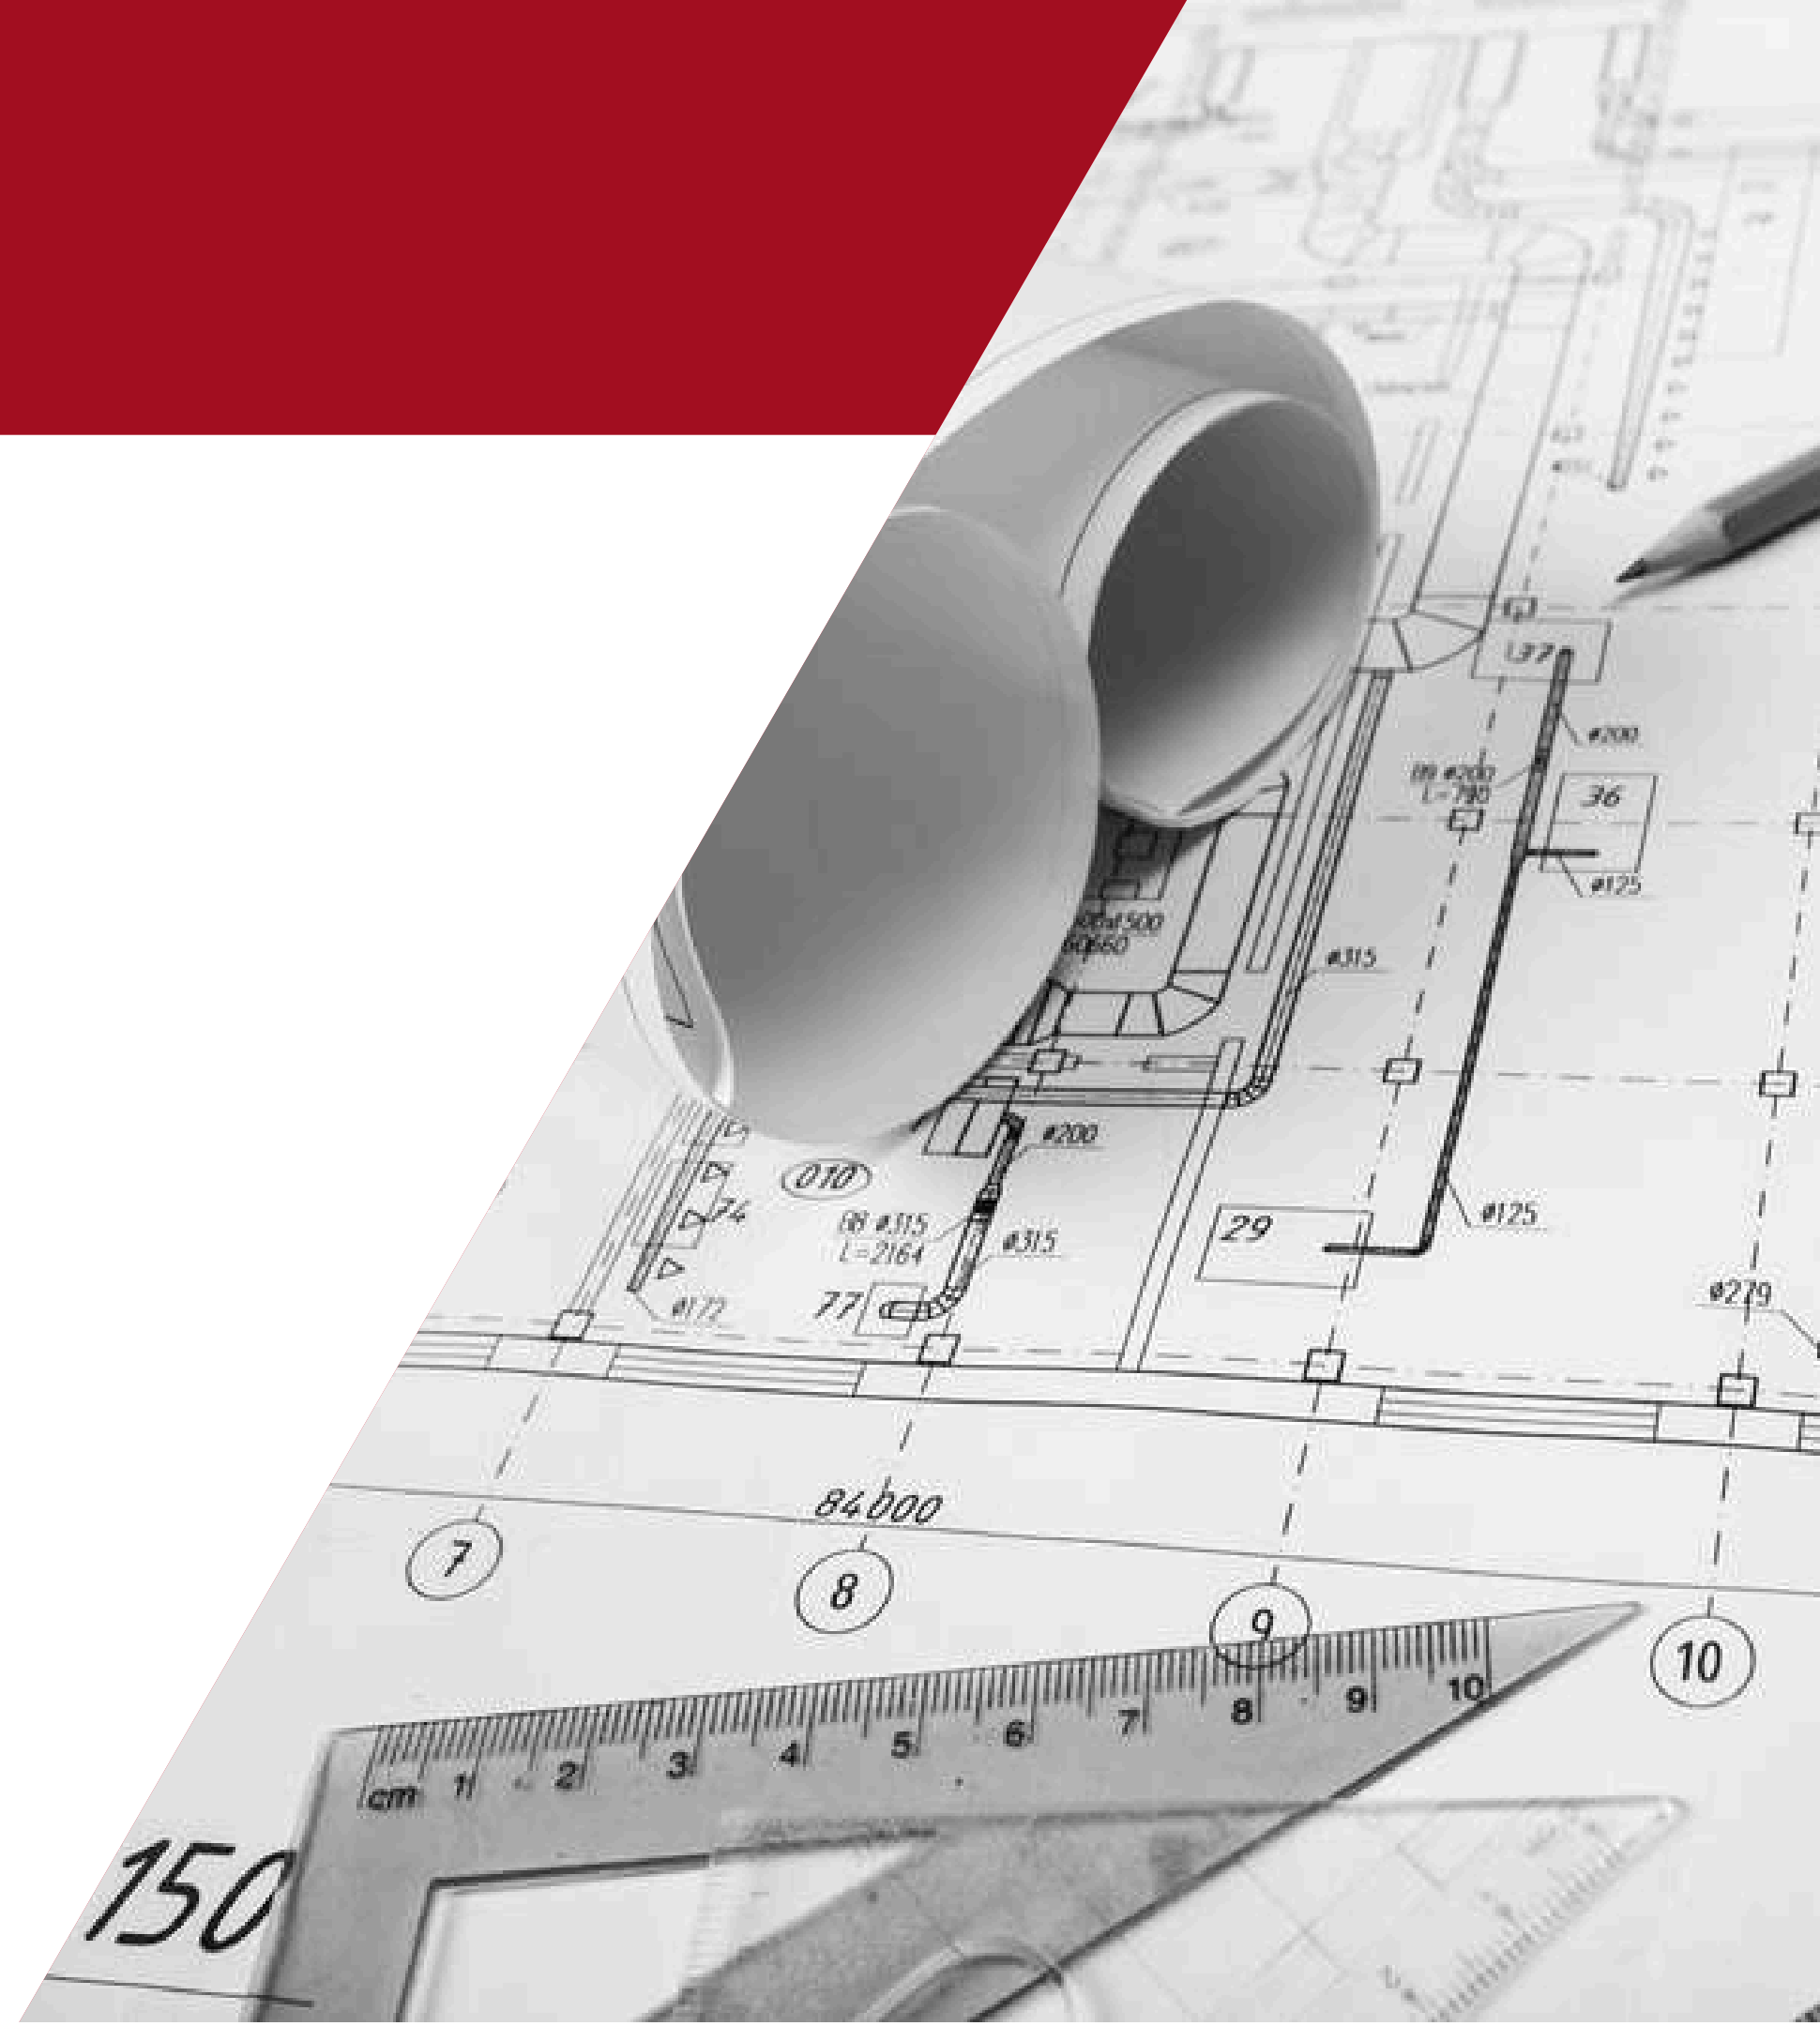

Engineering consulting

- We provide engineering consulting services in various regular and investigative fields, whether civil, architectural, or electromechanical engineering. this company supervises the implementation as a consultant to the contractor or a consultant to the owner, relying on a team of consulting engineers, project managers, quality control engineers, and occupational safety.
- The company provides its services to its clients with supervision in accordance with the specifications conforming to the requirements of the standard and international codes.

Technical services

- Making bill of quantity of all construction and finishing elements.
- Shop drawing and detailing for all designs
- Detailed tenders for projects

Civil & Structure services

- We use many different structural systems in the design, which suit the needs and specifications of the origin, including the system :
- Post tension, steel structure, solid slab, flat slab, paneled slab, hollow block
- We work on the design of residential buildings, administrative buildings, and factories.
- we work on infrastructure network as sewage plans, drainage, and rain drainage.

Architectural services

- We work on architectural plans and dividing spaces for buildings according to the requirements.
- We work on exterior designs for building facades.
- We work on interior designs and develop landscape plans for the project.
- We make brochures for project marketing.

Electromechanical services

- According to the architect, we develop plans for light current, CCTV system, earthing, power, and AC Or HVAC system layouts for the general location.
- We develop plans for fire fighting, fire alarm schemes and locate the places of fire tanks and escape routes
